Astral 150 with oxygen and non-invasive circuit set up

Oxygen tube

O² coupling insert

To O² supply

Astral 150

Standard tube single

Passive exhalation flow

Single limb adapter

Anti-viral filter

Anti-viral HMEF (Heat Moisture Exchange Filter)

Non vented mask
Note: Good mask fit is important to minimize risk of cross contamination
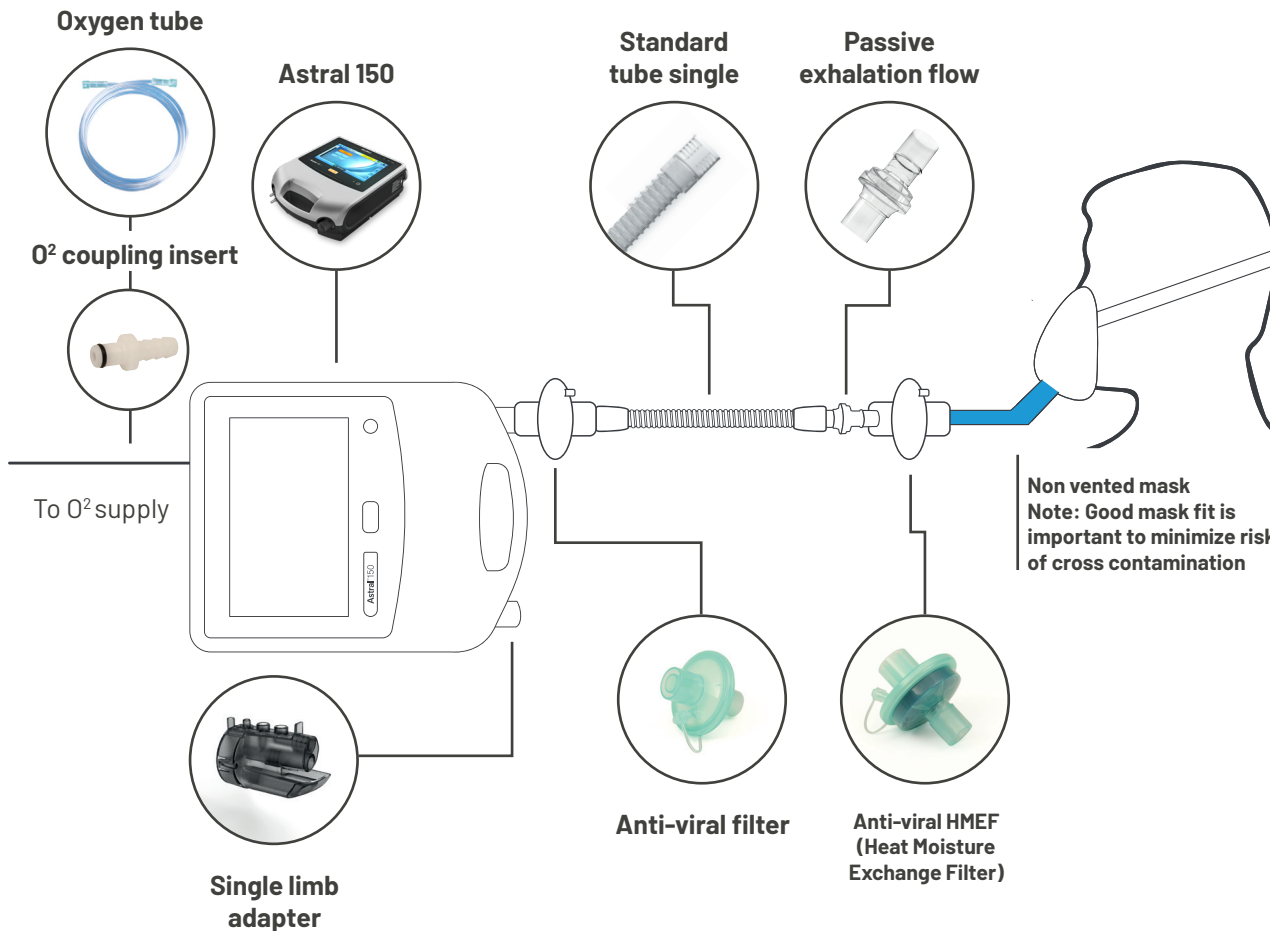

Only pressure modes available with single limb setups.

Astral notes
Max pressure: 50cm H_2O
Max backup breath rate: 50bpm
iVAPS mode is **not** recommended for COVID-19

Alarms: Low pressure, high pressure, low Vte, high Vte, low MVe, high MVe, low RR, high RR, ventilation stopped, circuit fault, ventilation not started

Oxygen notes
- Astral can take supplemental oxygen up to 30L/min
- FiO_2 monitoring available on the device if oxygen connected the device

Note:
- To ensure optimal ventilation, perform a "Learn Circuit" prior to patient use.
- Single Limb Adapter (Part Number: 27942) assembled internal to device is required for single limb circuit, refer to User Guides for assembly instructions
