

A simpler way to approach mask selection

New mask categories to suit every wearer

Choose the right mask the first time round

Helping your customers choose the right mask is crucial to CPAP therapy success. To make it easier to understand the key benefits of each mask in our growing range, we've introduced new mask categories.

Every ResMed mask is designed to deliver effective therapy and a comfortable night's sleep, yet each one caters to different needs. Our new mask categories can serve as a conversation starter between you and your customers, helping you understand what they truly want.

Minimalist category

Small. Light. Simple.

For many CPAP users, the deciding factor is simple – they want less mask on their face. Our minimalist category features masks that are small, lightweight and discreet. They are a great option for those wanting something that won't affect their ability to read or watch TV in bed.

AirFit™ F30

AirFit™ N30

AirFit™ P10

Freedom category

Sleep and move comfortably.

Masks in our freedom category feature a top-of-head tube connection, keeping the air tubing out of sight and out of the way. These masks enable active sleepers to comfortably move around at night and sleep in many positions, including on their back, side or stomach.

AirFit™ F30i

AirFit™ N30i

AirFit™ P30i

Ultra Soft category

Patented memory foam offers unique comfort.

Mask discomfort is the top reason CPAP users stop therapy.¹ Our Ultra Soft category is designed to change that. These masks feature a memory foam cushion, which is softer than silicone and may lessen the potential for red marks and irritation, particularly for people with facial hair or sensitive skin.

AirTouch™ F20

AirTouch™ N20

Universal Fit category

Classic designs that fit nearly every face.

The hardest thing about our universal fit category is finding a face it doesn't fit. With a fit range of 96% for AirFit F20 and 99% for AirFit N20²⁻⁵, you can reach for these masks with confidence. They're also designed to perform well across a wide range of therapy pressures.

AirFit™ F20

AirFit™ N20

Awaken your best.

¹ ResMed AirTouch™ F20 rescue study: 30-day assessment of 30 participants who intended to quit CPAP therapy with prescribed mask at balance. Jan 15, 2018 to Feb 22, 2018 in San Diego, CA. ² ResMed AirFit F20 internal Australian fitting study of 27 existing CPAP patients, conducted between March–April 2016. ³ ResMed AirFit F20 internal USA fitting study of 34 existing CPAP patients, conducted April 2016. ⁴ ResMed AirFit F20 internal EU and APAC fitting study of 90 existing CPAP patients, conducted June 2016. ⁵ ResMed AirFit N20 internal international fitting study of 159 existing CPAP patients, conducted Nov 2015.
